EXPECTED LEARNING OUTCOMES

After successfully completing this course, you should be able to:

Learning Outcome	EA Stage 1 Competencies
------------------	-------------------------

- | | |
|---|--|
| 1. Appraise a project through cost benefit analysis and account for | |
|---|--|

lectures etc.

Lecture Recordings+

All lectures in this course will be recorded using the Echo 360 system. You can access these recordings through the Moodle site. Instructions for how to do this can be found in Moodle. If you are not able to attend the lecture then you are expected to watch the recording. This includes distance students.

Lecture notes will be provided on Moodle. However, these notes only provide a broad outline of the theory covered. They do not contain the stories and anecdotes used to illustrate the theory and the numerical examples. These numerical examples are worked out on the screen so that you can follow them in the lecture recordings. Also the lecture recordings will contain demonstrations of the assignments and other information that may be important for completing the assignments.

DATES TO NOTE

Appendix A: Engineers Australia (EA) Competencies
Stage 1 Competencies for Professional Engineers

	Program Intended Learning Outcomes
	PE1.1 Comprehensive, theory-based understanding of underpinning fundamentals

PE1: Knowledge
and Skill Base
