Problem-Solving Class

Learning Outcome	EA Stage 1 Competencies
3. Define the key components used in vehicle design and how these affect automotive performance outcomes.	1.1,

A case study will be used to help students enhance their understanding of the fundamental course concepts. A field trip will be organised to provide a hands-on experience to enrich the learning experience. Upon completion of the field trip, students will complete a technical report. The students will be provided with guided questions and feedback to support their technical writing.
