An abstract geometric drawing consisting of a complex network of thin, light gray lines. The lines intersect to form various shapes, including a large, irregular polygon on the right side and several curved, organic forms on the left. A single, small red dot is positioned at a central intersection point of several lines. The word "Archi." is written in a bold, red, sans-serif font, slanted upwards from left to right, and is placed over the lower-left portion of the drawing.

The background consists of several overlapping, semi-transparent red shapes on a white background. These shapes include a large circle on the left, a large triangle on the right, and various other polygons and curved forms that create a complex, layered geometric pattern. The red color is a muted, earthy shade.
